

Maestro 3D Ortho Studio

**Innovative solutions for
orthodontic applications**

Maestro 3D Ortho Studio

Main features

- Analysis and measures
- Virtual bases: Parallel, ABO, Ricketts, Tweed
- Virtual Setup
- Creation of models ready for 3D printing
- Free viewer for inspection of case studies, also available for Apple iPad
- Modular software
- Open software without annual fees
- Free updates

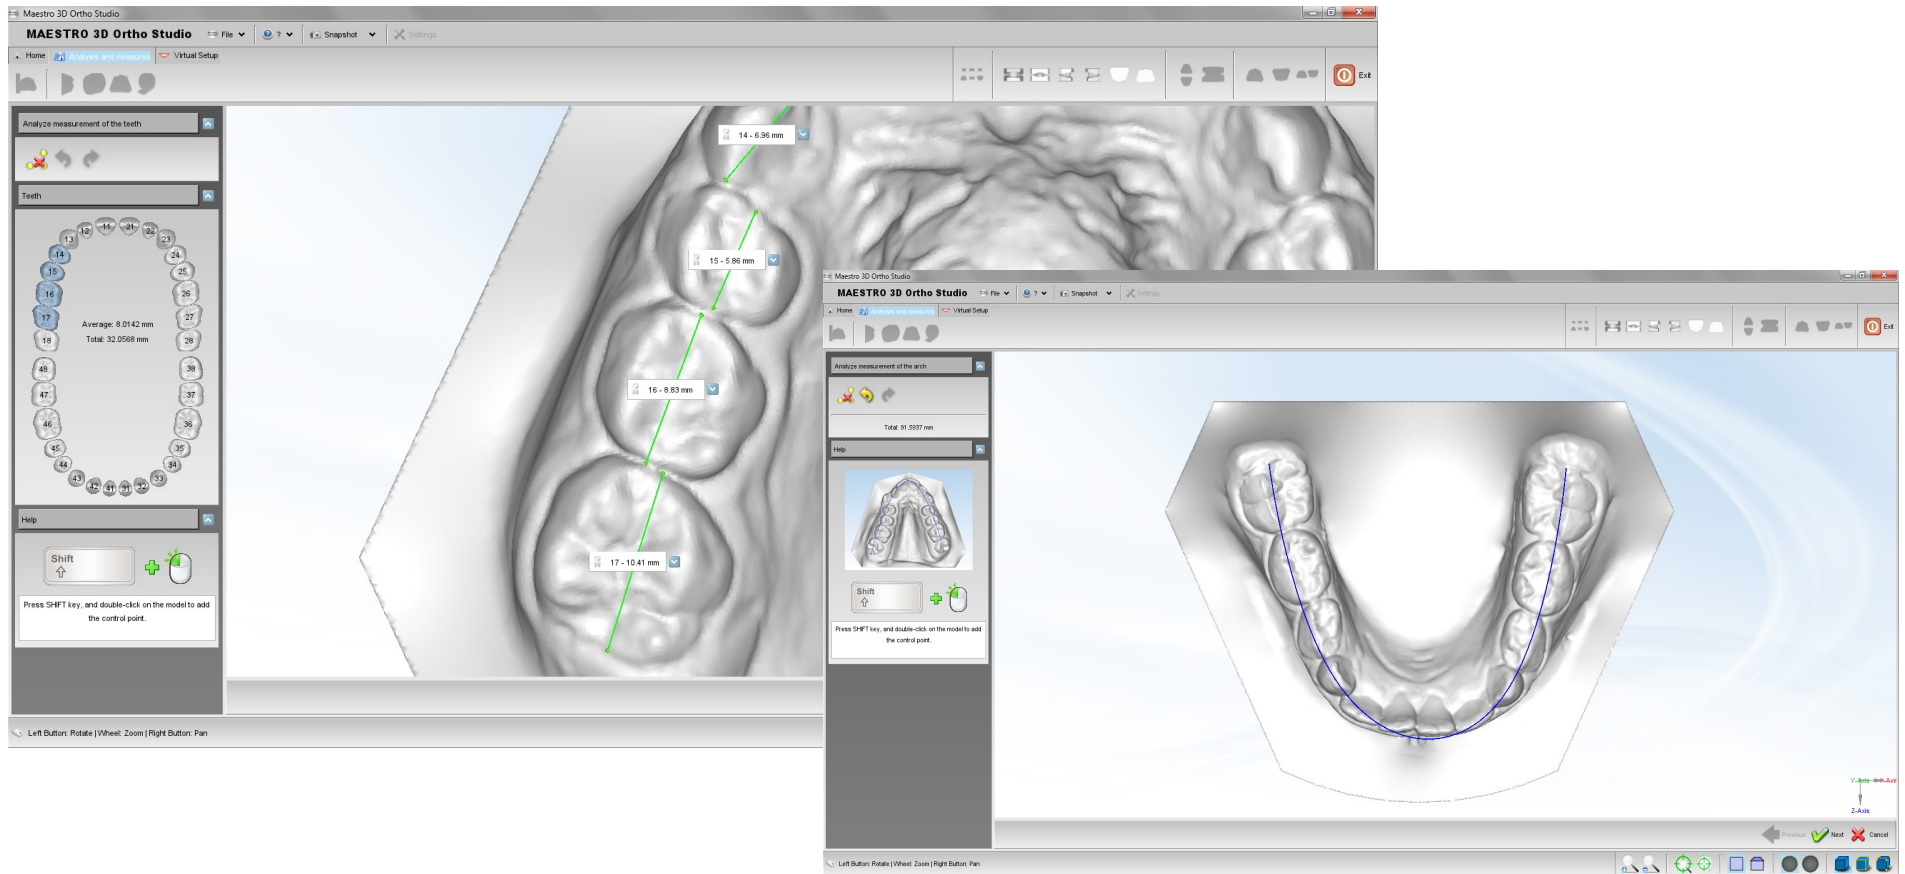

Maestro 3D Ortho Studio

Basic module

- Database for storing case studies
- Integration with **Maestro3D** scanner
- Analysis and measures: teeth/arch measures, 3D/2D cross sections (overjet, overbite), occlusion inspection
- Stitch the virtual bases: Parallel, ABO, Ricketts, Tweed
- Export case studies in *ortho file format*, compatible with the free viewers

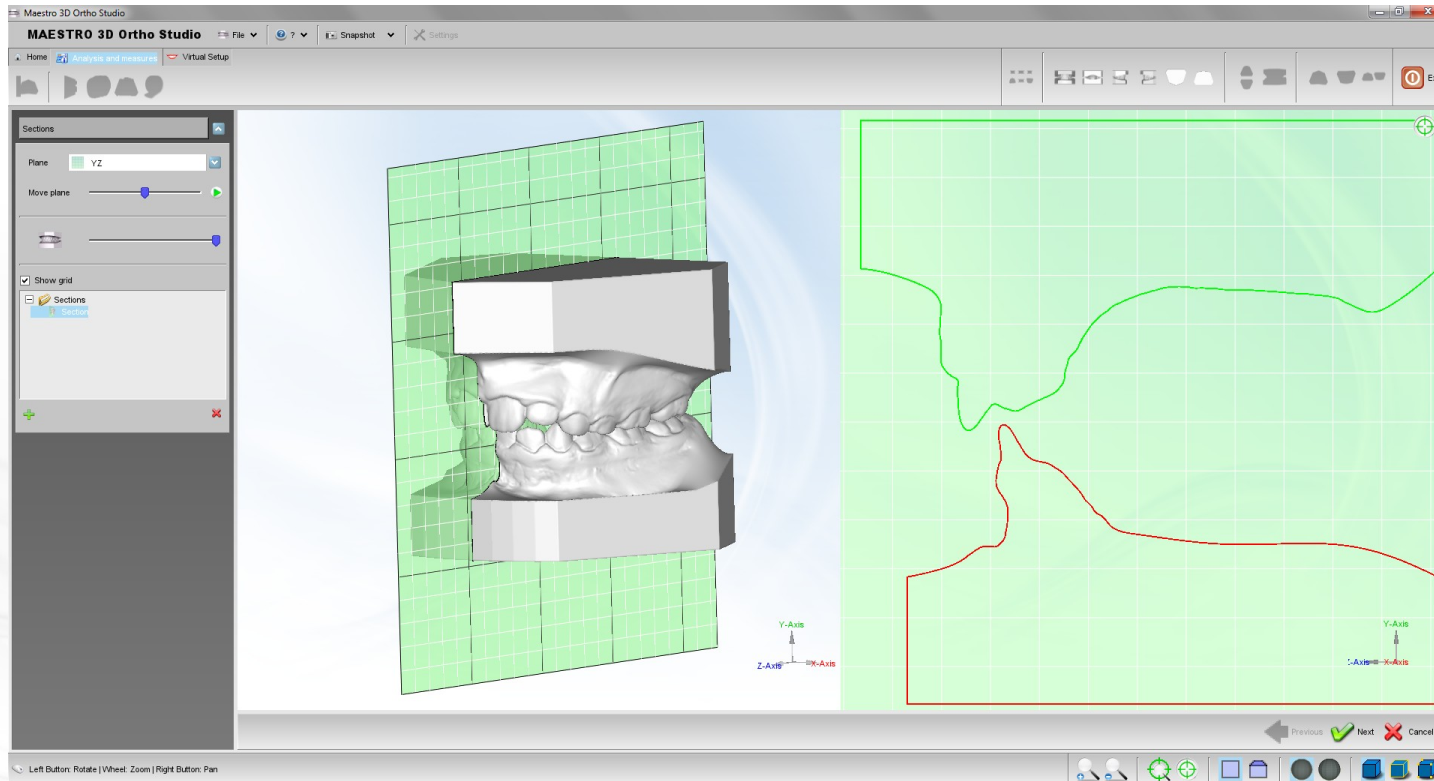

Maestro 3D Ortho Studio

Analysis and measures teeth/arch measures

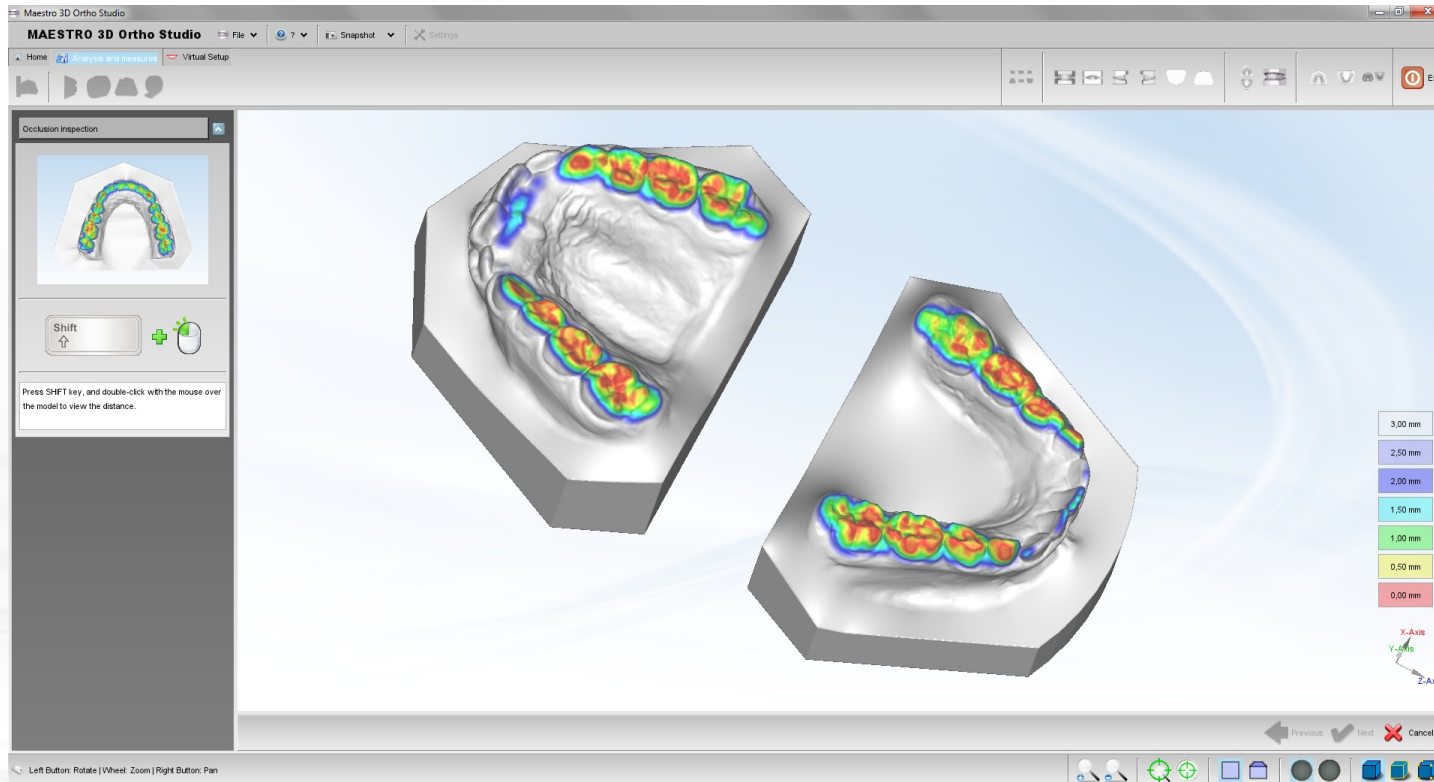

Maestro 3D Ortho Studio

Analysis and measures 3D\2D cross sections

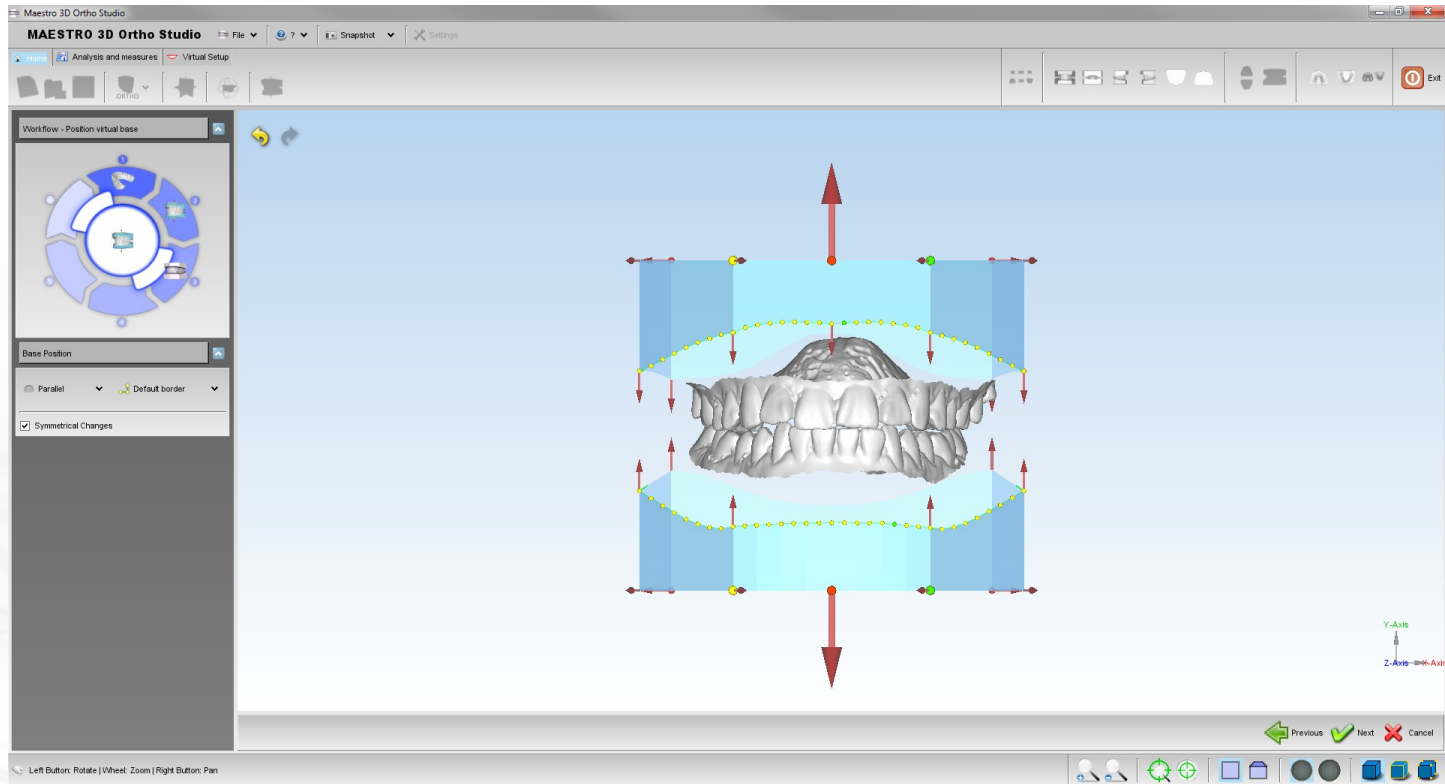

Maestro 3D Ortho Studio

Analysis and measures occlusion inspection

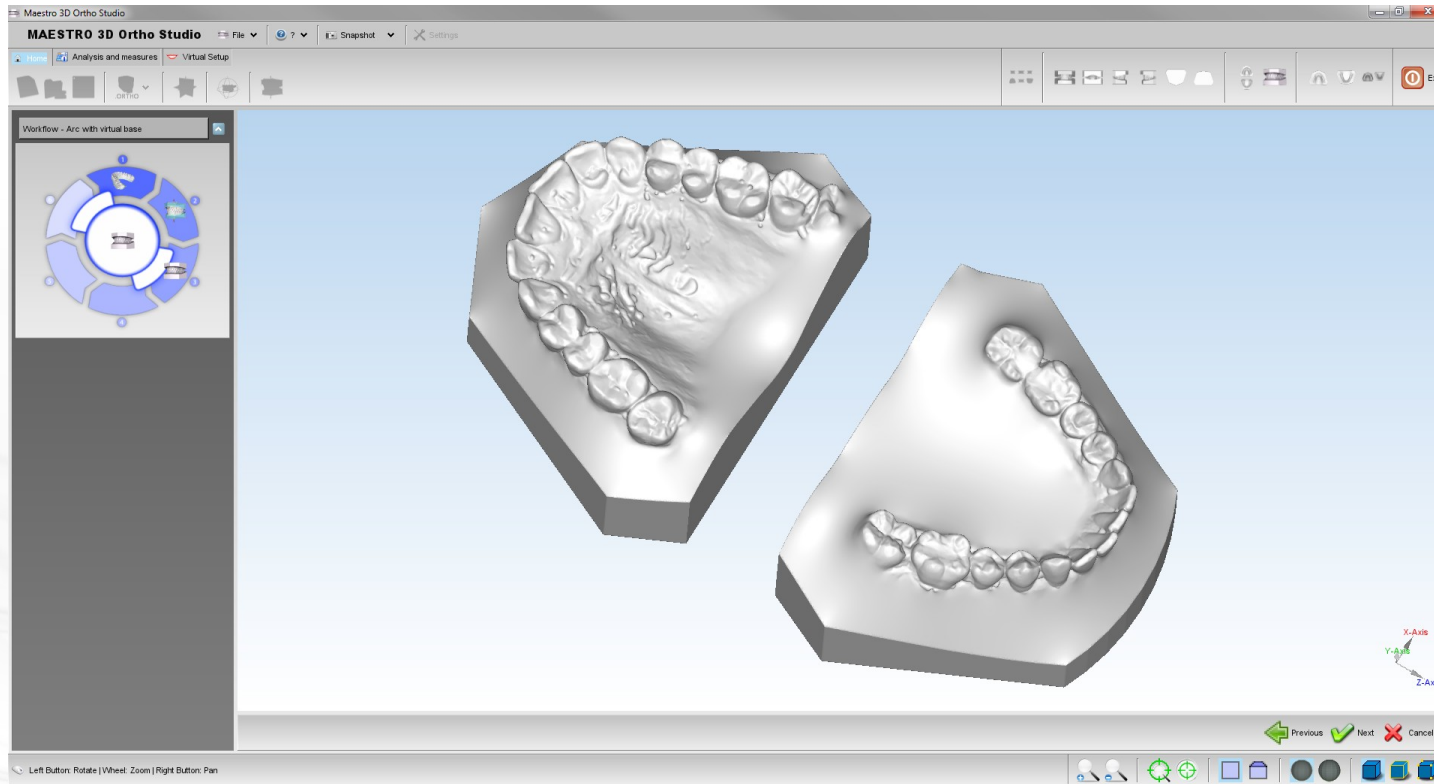

Maestro 3D Ortho Studio

Virtual bases: Parallel, ABO, Ricketts, Tweed

Maestro 3D Ortho Studio

...result after the modeling

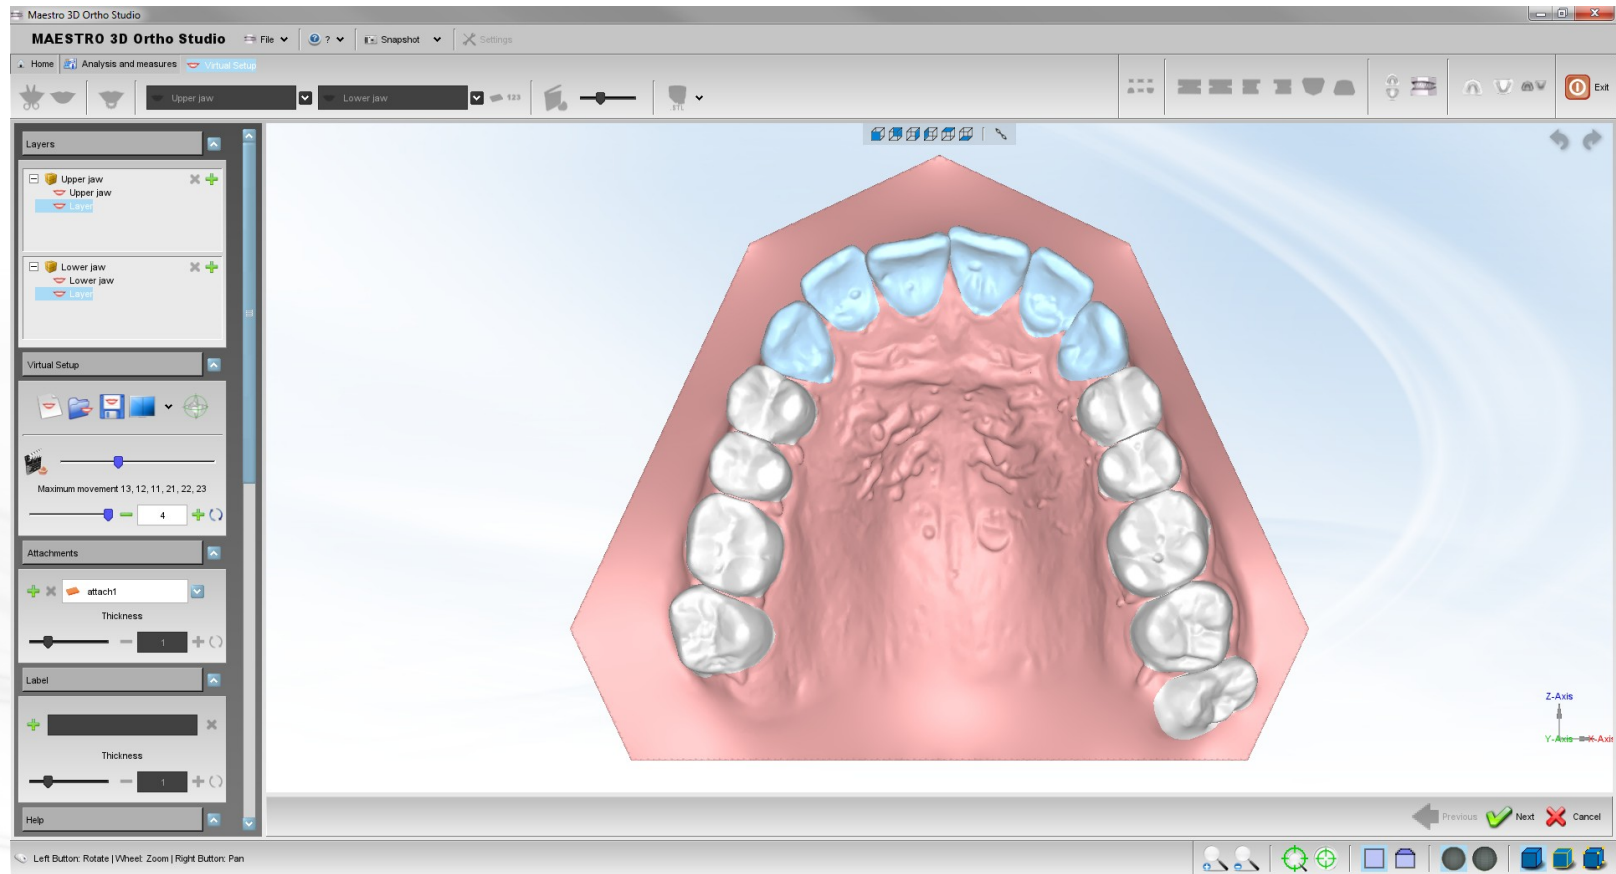

Maestro 3D Ortho Studio

Virtual Setup module

- Tooth segmentation
- Displacement of the teeth and evaluation of the contacts and intersections
- Attachment designer
- Label designer
- Modeling using multiple views
- Animations
- Projects exports and projects sharing

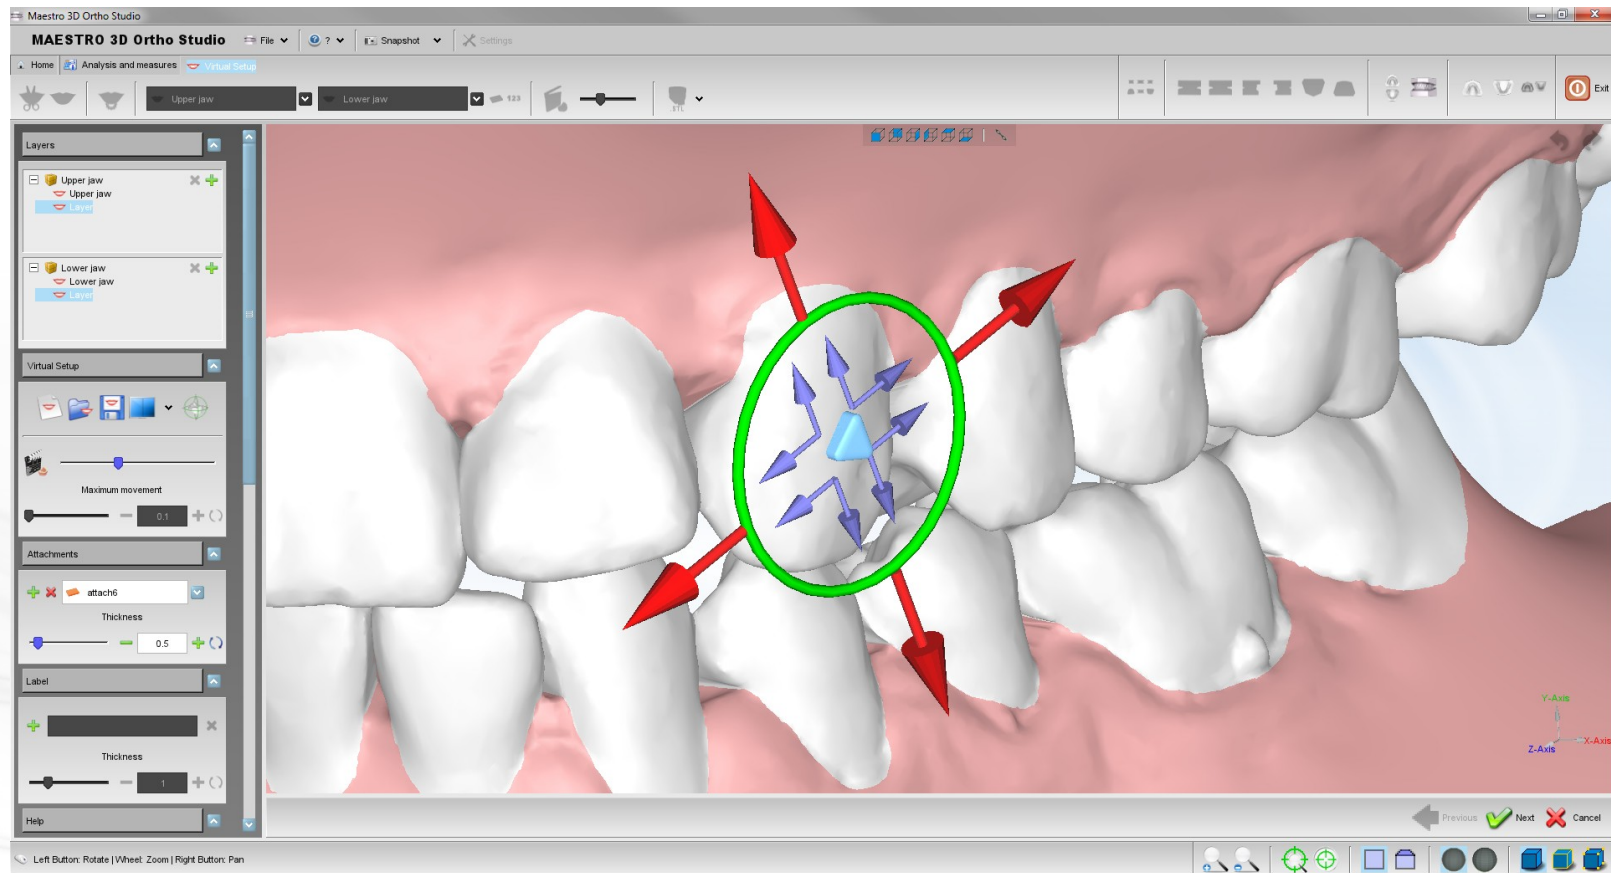

Maestro 3D Ortho Studio

Displacement of the teeth

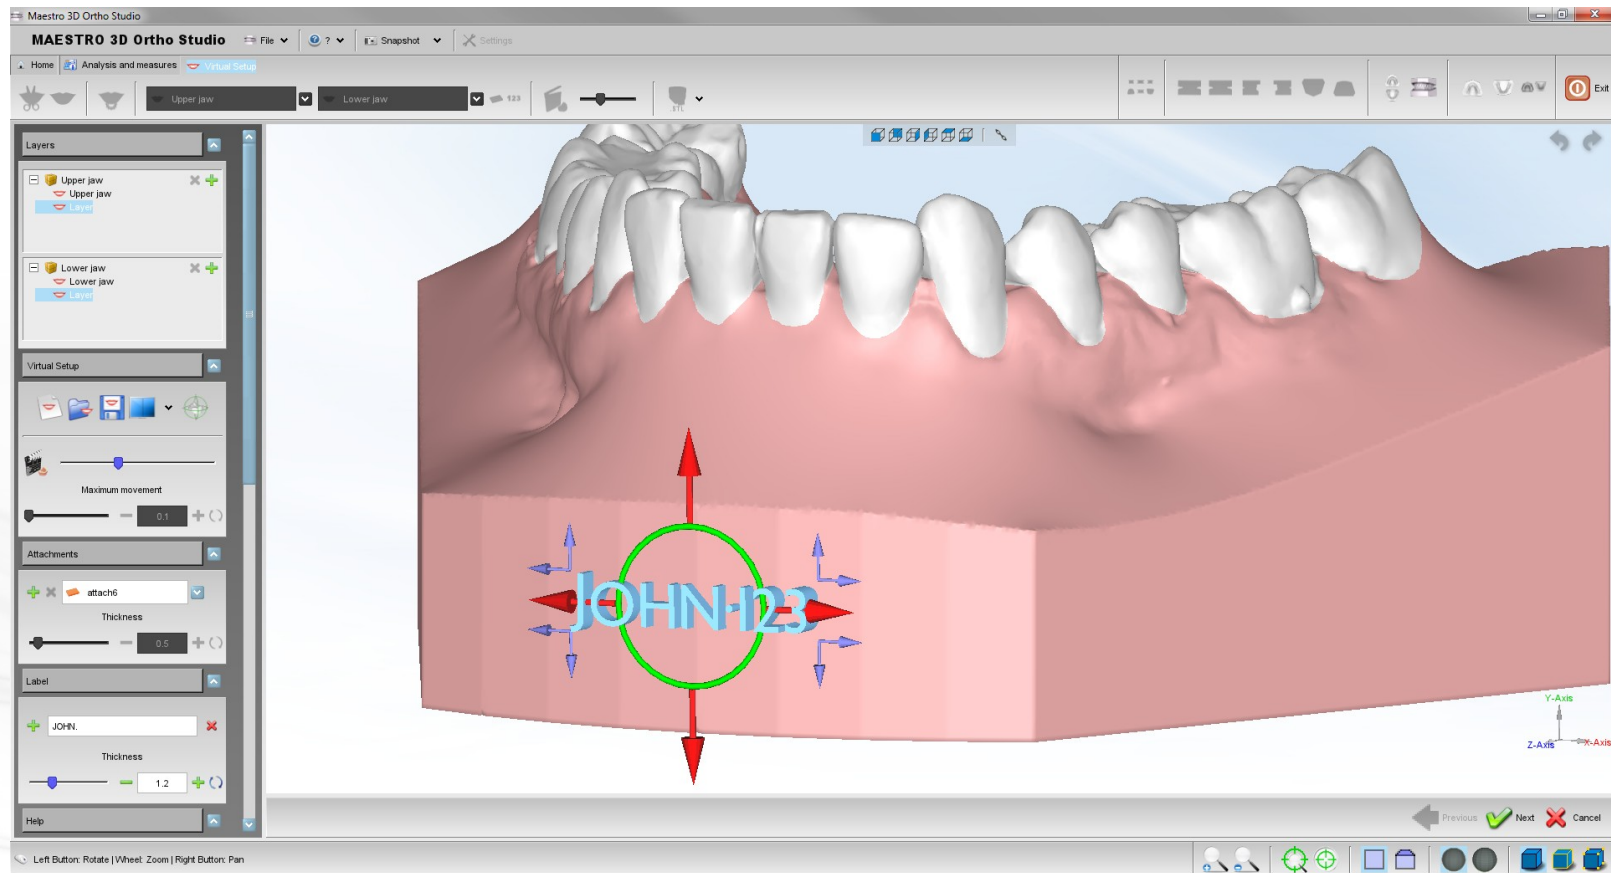

Maestro 3D Ortho Studio

Label designer

Maestro 3D Ortho Studio

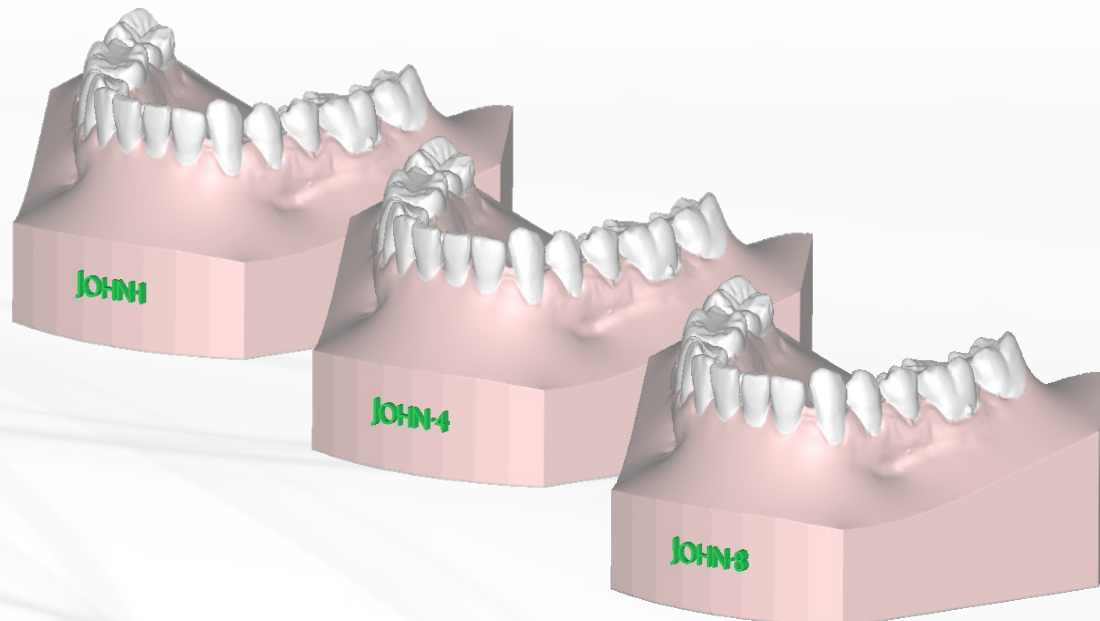

Modeling using multiple views

Maestro 3D Ortho Studio

Models Builder module

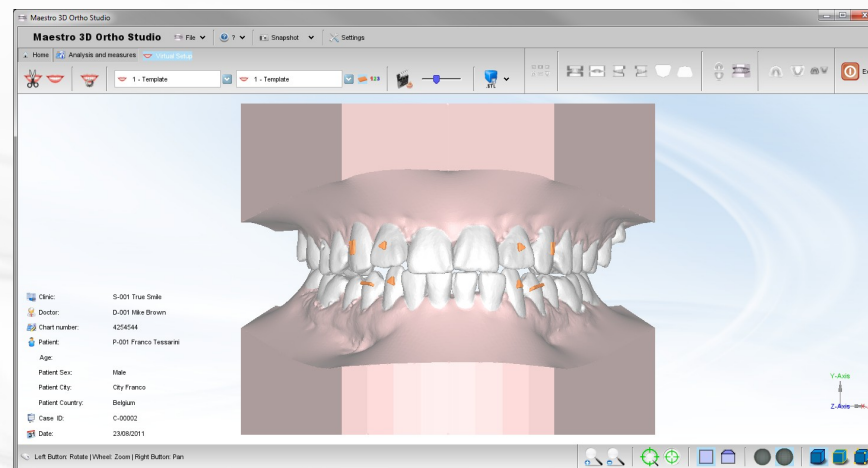

- Builds all the necessary 3D models for the orthodontic treatment
- Open STL files ready to send to a 3D printer

Maestro 3D Ortho Studio

Viewer

- Free software to view and inspect the models exported with Ortho Studio.
- Useful to do the digital service for your customers. With this viewer the customers can open the models and see the virtual setup.

Maestro 3D Ortho Studio

...also available for Apple iPad
